

Reflecting on your Lesson Observation

Questions to explore with teachers

1. What went well in the lesson — what made it work?
2. What would you adapt or do differently next time?
3. How did your strategies support pupil learning and engagement?
4. What evidence showed pupils were making progress?
5. How did you respond to pupils' needs during the lesson?
6. How does this lesson link to your current goals?
7. What strength stood out most — and how could you build on it?
8. What area could develop further, and what support would help?
9. If you taught this again, what one change would make the biggest difference?
10. What's your next actionable step for improvement?
