

Turning data into meaningful action that improves outcomes and reduces workload.

Touchpoints:

- 1 Understand how to use student data to drive school improvement rather than simply measure performance.
- 2 Identify the data that matters most and eliminate unnecessary data collection.
- 3 Analyse trends, patterns and gaps in learning to inform teaching and intervention.
- 4 Monitor the progress of key groups and use evidence to target support effectively.
- 5 Lead confident and productive discussions about data with staff and stakeholders.
- 6 Develop efficient systems that reduce workload and create a positive data culture.
- 7 Turn insight into action by evaluating impact and making informed decisions that improve outcomes.

Who is it for?

- Senior Leaders
- Middle Leaders
- Heads of Department
- Curriculum Leaders
- Assessment Leads
- Teachers with responsibility for student progress
- School Improvement Teams

What will it do?

Develop a consistent approach to using student data across your school to strengthen teaching and learning, inform interventions, and improve pupil outcomes.
